#### WB Chapter 39 - karnsbiology.com

Female Reproductive System. In girls, the primary sex organs are the two ovaries. The ovaries release the eggs. They are also endocrine glands that make the hormones estrogen and progesterone. The accessory sex organs include the uterus, uterine tubes (also called fallopian tubes), which bring the egg to the uterus, and the vagina.

#### Reproductive System - Female

The reproductive system doesn't start to work at full speed until puberty. The organs of the reproductive system include a pair of primary sex organs and their accessory sex organs , such as glands, ducts and the sex organs on the outside of the body - the external genitalia or genitals.

#### Reproductive System - Male
